

F-ComFlow

Social Commerce OS for Bangladesh

From Messenger chat to delivered parcel — one dashboard.

TEAM

THE PROBLEM

Over 60% of Bangladesh's online sales happen inside Facebook & Messenger chats, not on websites. Sellers juggle:

- Orders scattered across DMs & comments
- Manual inventory & courier booking
- No tracking of COD, returns or profit

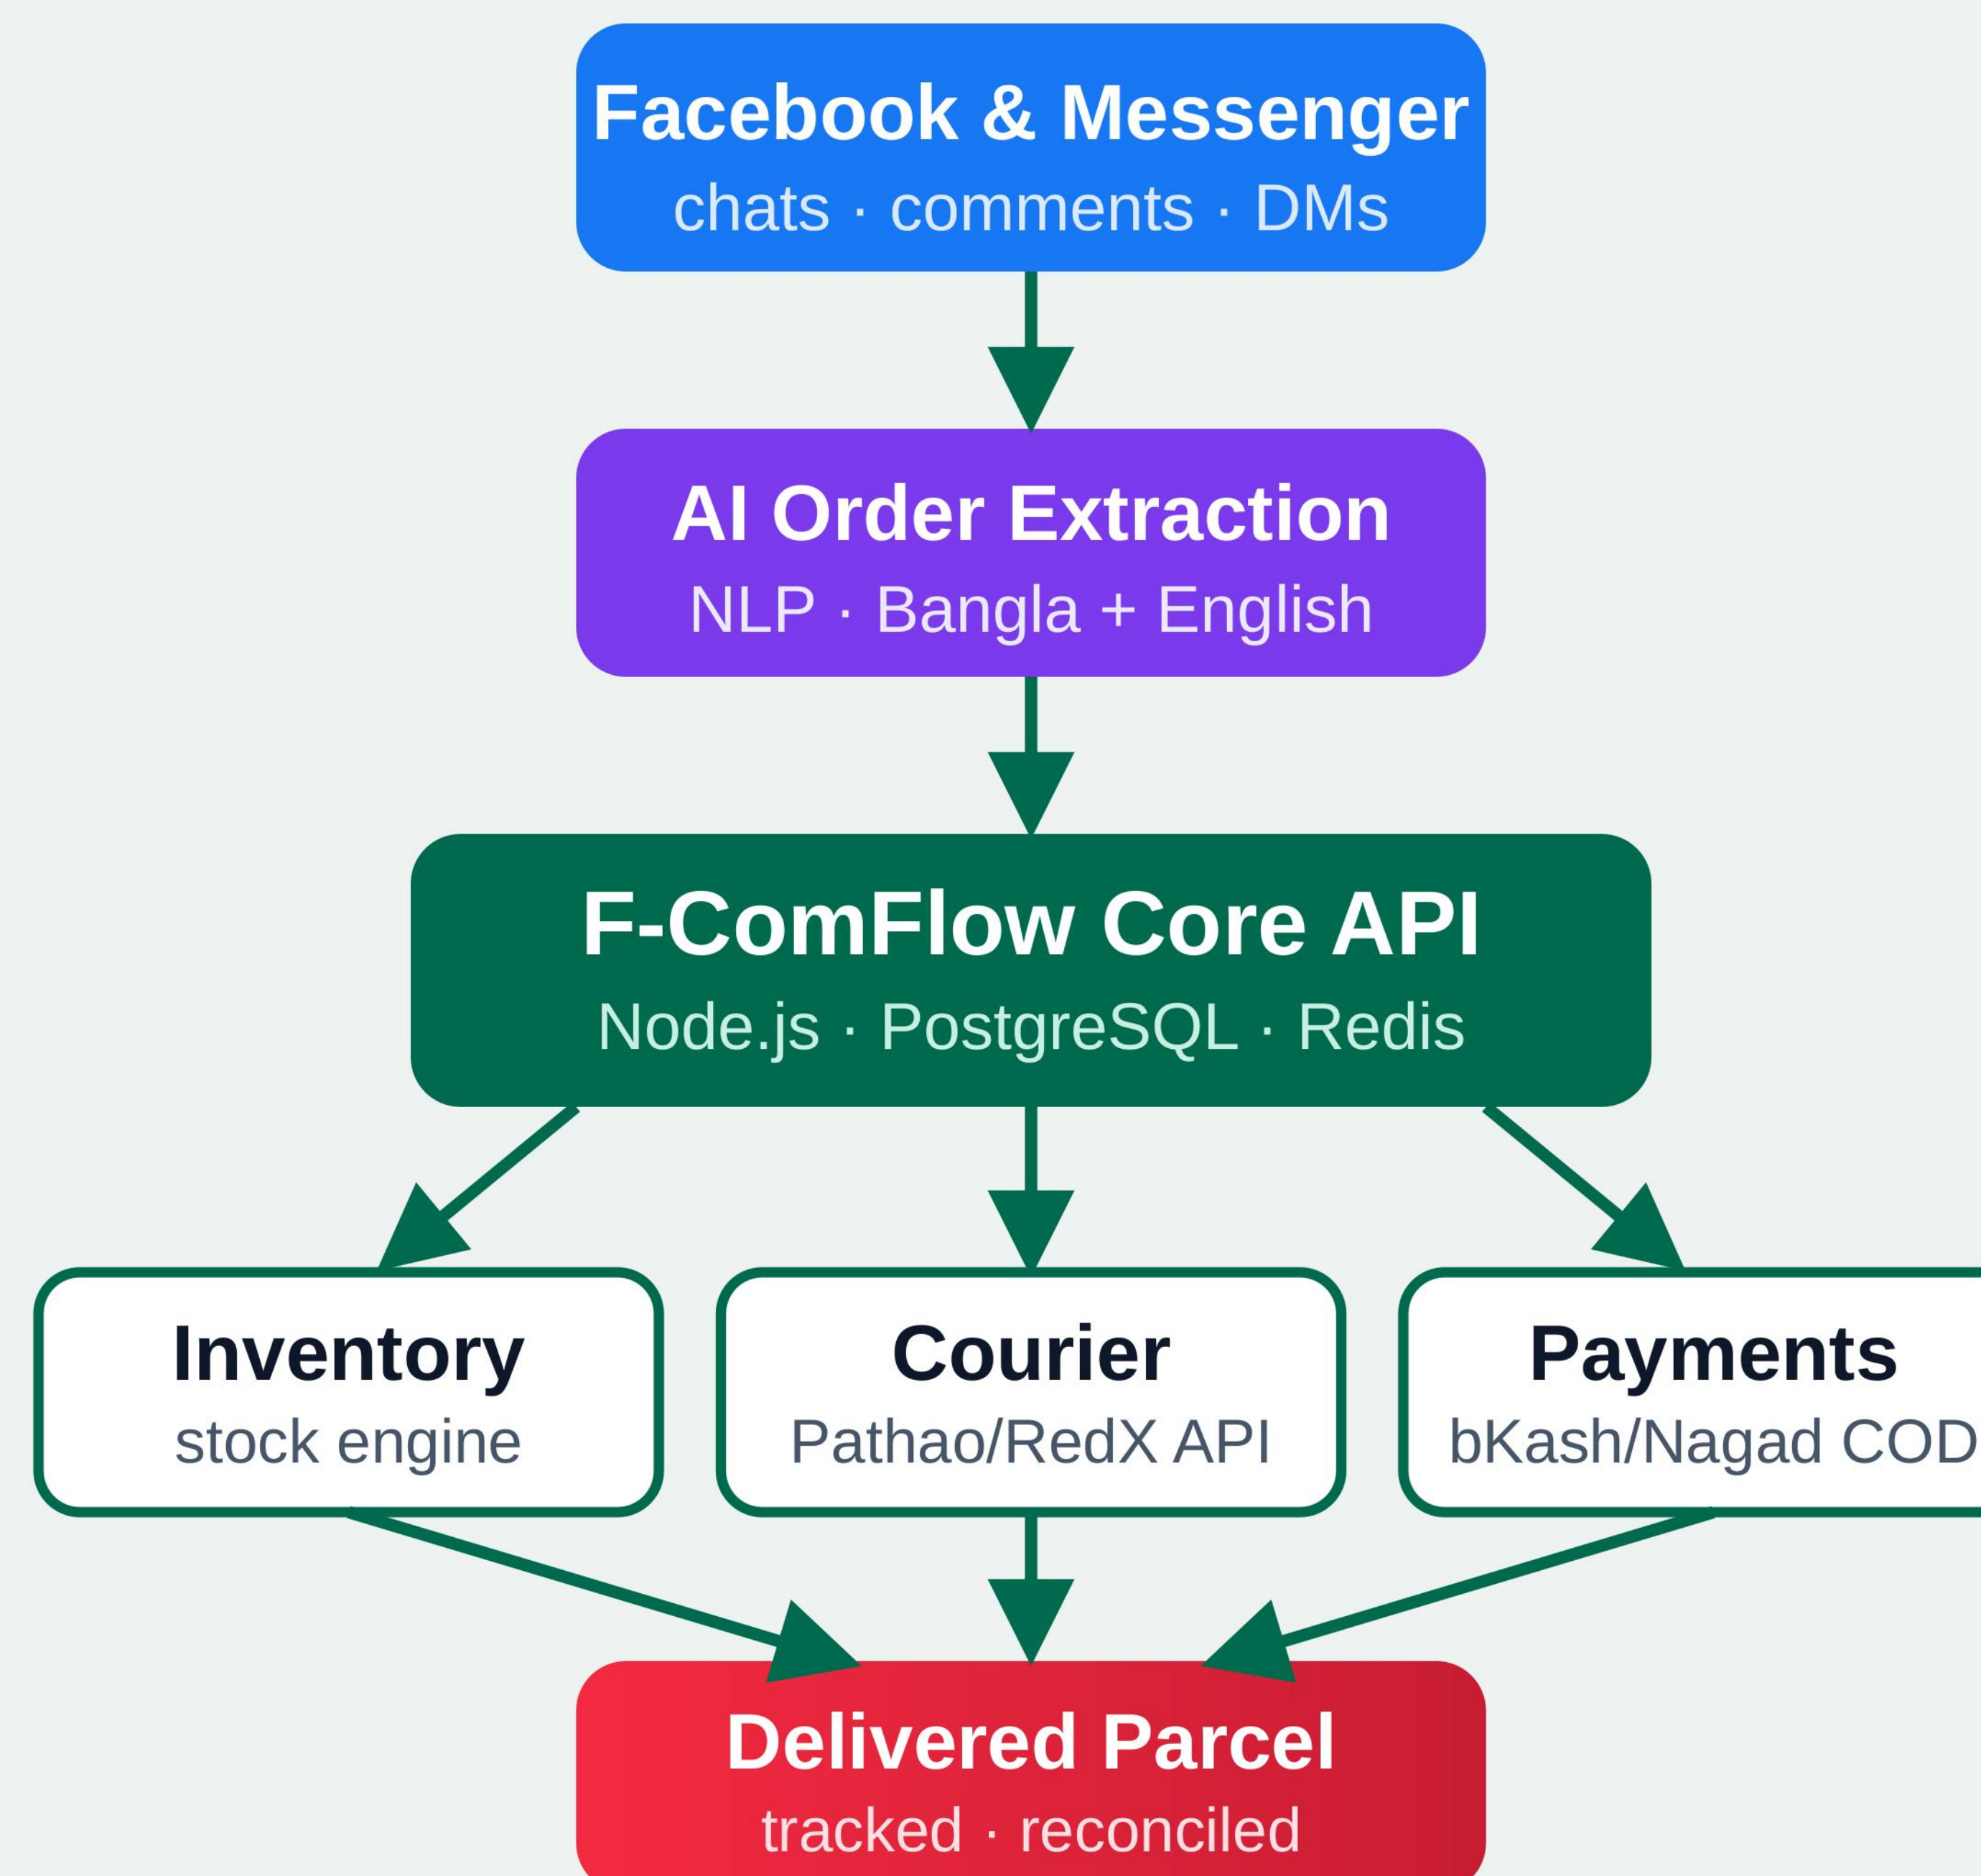

OUR SOLUTION

F-ComFlow is an all-in-one operating system for social commerce sellers. It captures orders straight from Messenger using AI, then manages inventory, courier dispatch, payments and analytics — all from a single unified dashboard.

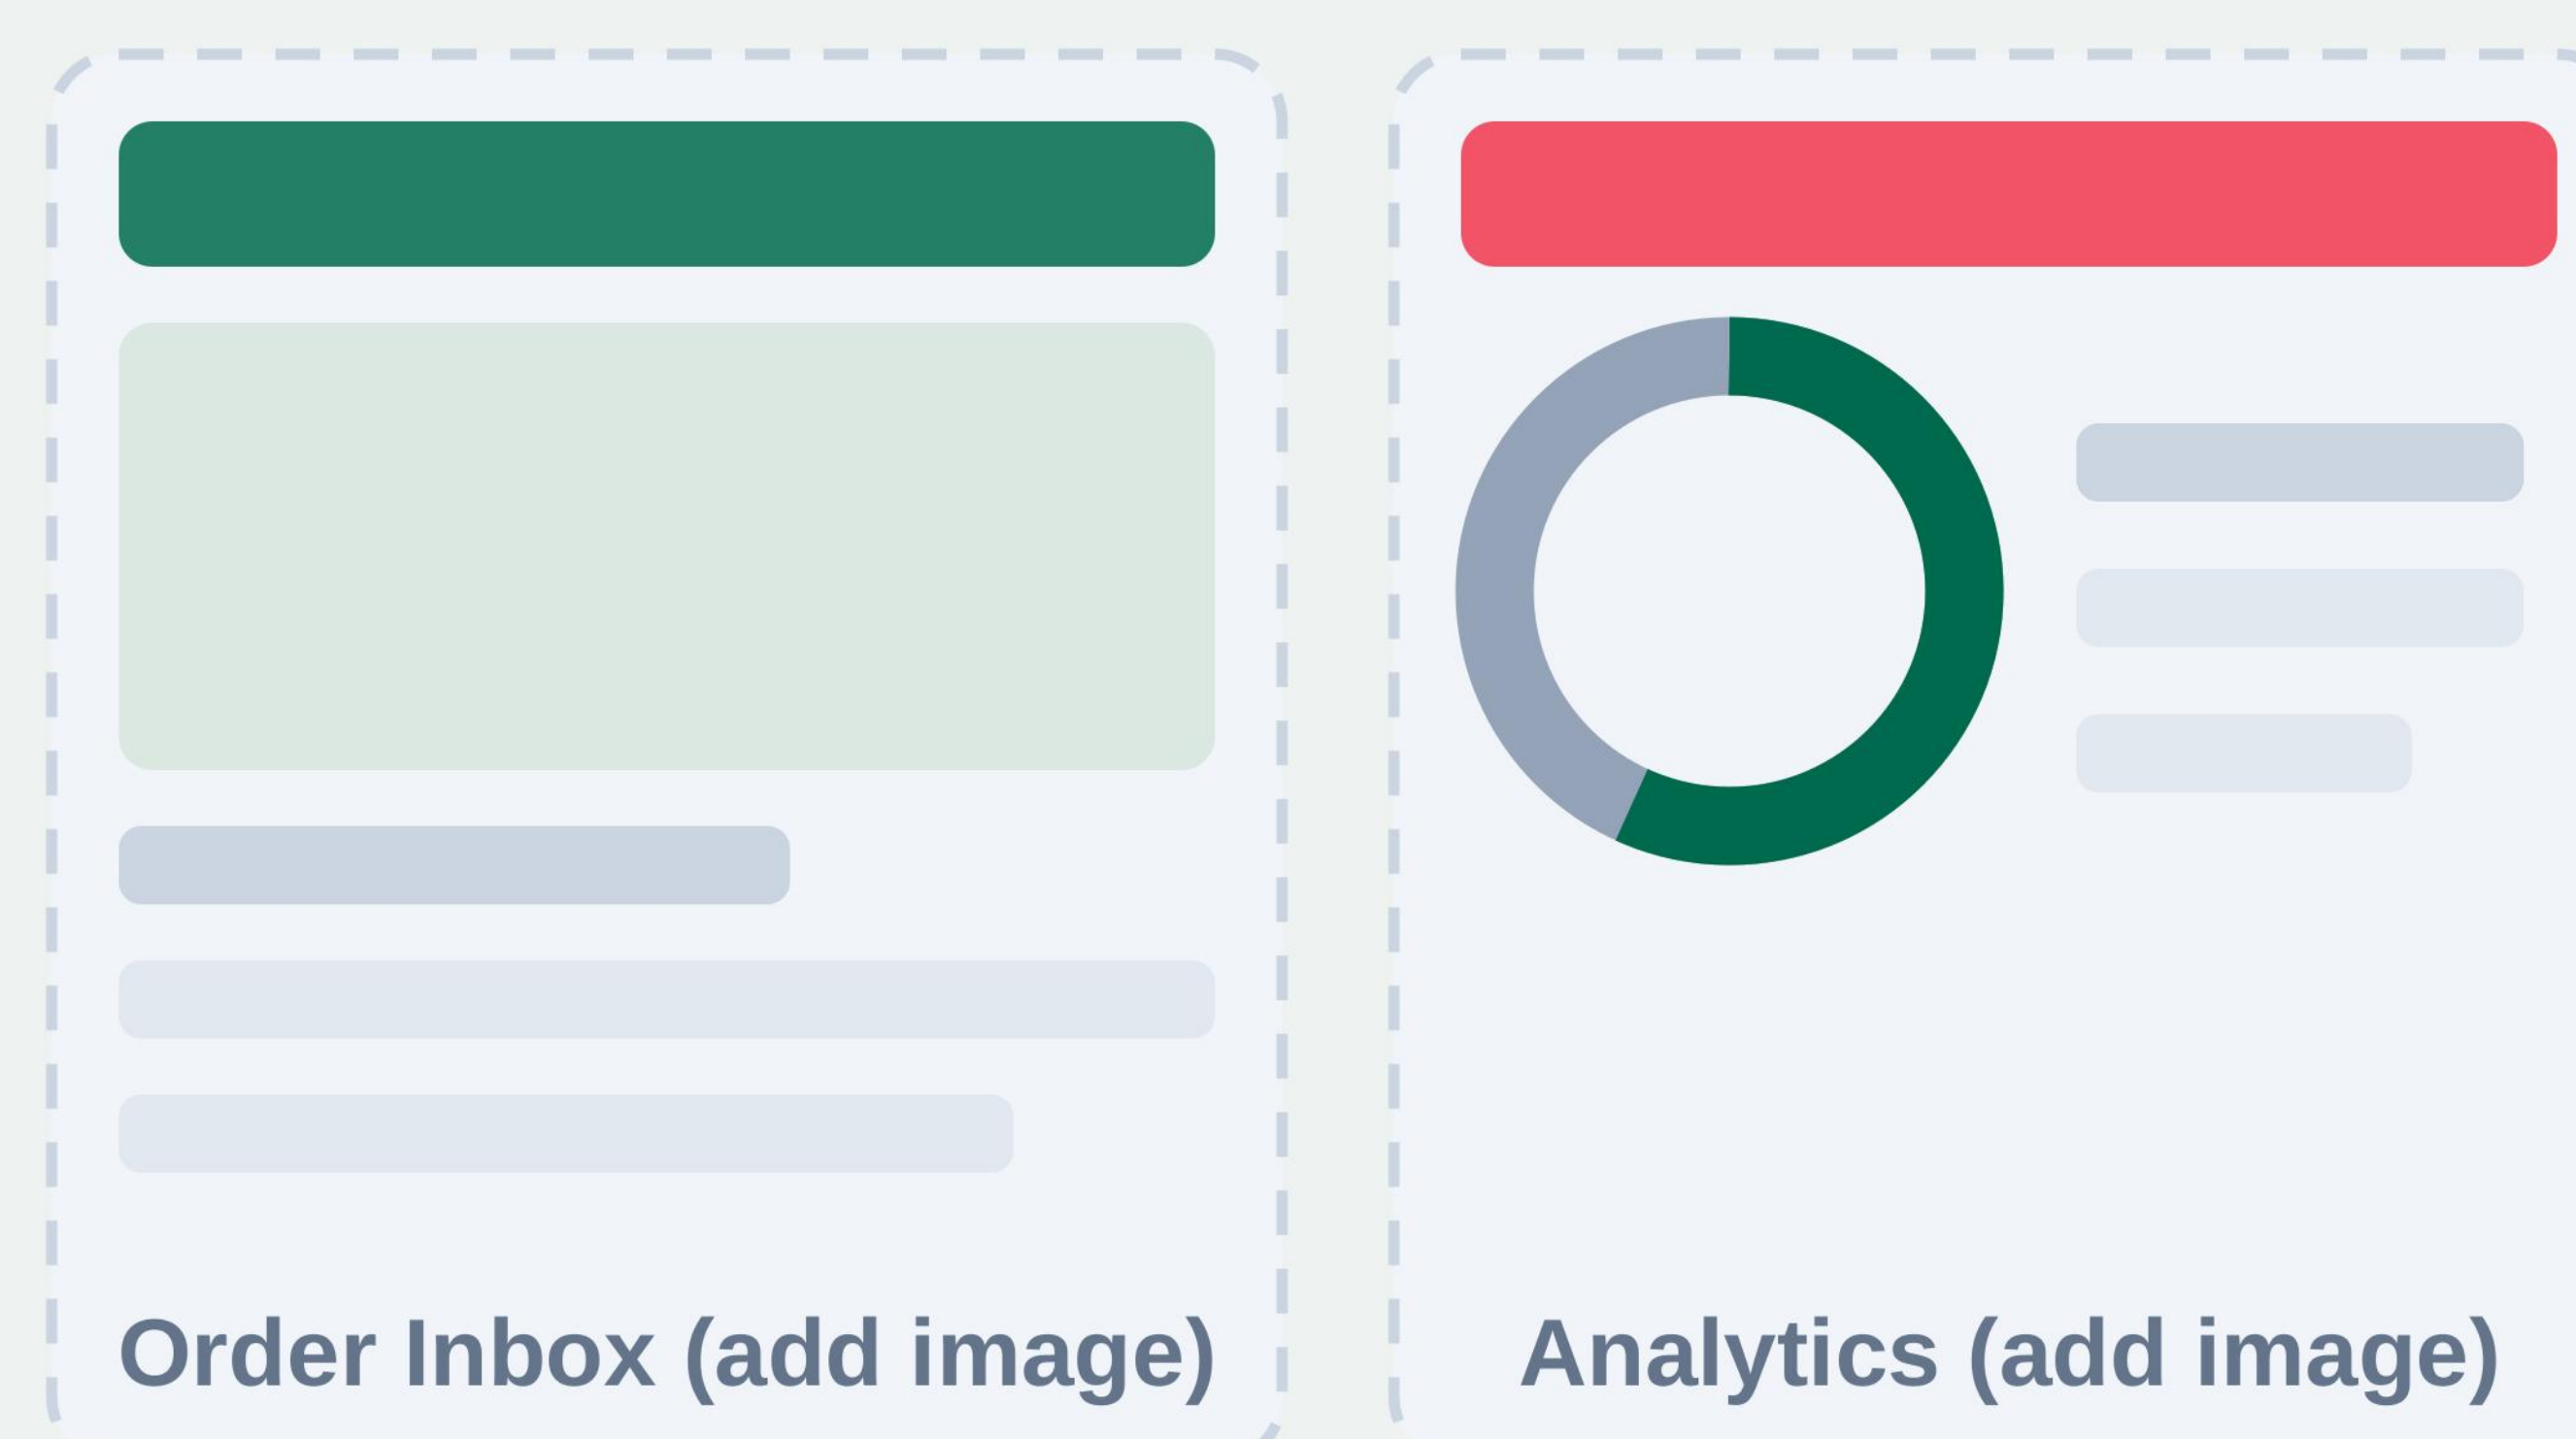

KEY FEATURES

- **AI Chat-to-Order capture**
Auto-reads DMs & comments into structured orders
- **Smart inventory & auto-stock sync**
Live stock counts, low-stock alerts
- **One-click courier & COD tracking**
Pathao, Steadfast & RedX integrations
- **Profit & return analytics dashboard**
